

MOHAMMAD SHAMREED

Systems Engineer | IT Support & Infrastructure

✉ mohammadshamreed@gmail.com • ☎ +91 8105940778 • 📍 Mangalore, India • ✈ Relocating to Dubai, UAE — Available 9 Sept 2026

PROFESSIONAL SUMMARY

Results-driven Systems Engineer with nearly 2 years of experience at Winman Software, specializing in systems administration, IT infrastructure support, and team supervision. Hands-on experience managing Windows environments, Task Scheduler, and Active Directory/Domain Controller operations, supervising a team of 6, and automating tasks with Batch, PowerShell (PS1), and Python. Additional exposure to manual software testing, R&D, and coding contributions. Skilled in networking fundamentals (TCP/IP, DNS, DHCP) and basic Linux administration, with a proven ability to troubleshoot complex issues, perform root-cause analysis, and collaborate cross-functionally to improve system reliability. Backed by a strong academic foundation in Electronics & Communication Engineering. Relocating to Dubai, UAE on 9 September 2026 and available to join immediately; seeking Systems Engineer, IT Support Engineer, System Administrator, or IT Infrastructure roles in the UAE.

PROFESSIONAL EXPERIENCE

System Engineer — Winman Software

Nov 2023 – Aug 2026

Mangalore, India

- Administered and maintained Windows-based systems and IT infrastructure as a System Engineer, managing Task Scheduler automation, Active Directory/Domain Controller operations, and day-to-day system administration to ensure operational stability and uptime.
- Supervised and led a team of 6, allocating daily tasks, monitoring progress, and ensuring timely, quality completion of project deliverables.
- Designed and developed automation scripts using Batch and PowerShell (PS1) to streamline repetitive administrative tasks, improving operational efficiency and reducing manual effort.
- Monitored, configured, and maintained system and test environments, ensuring smooth and uninterrupted operations across the team's daily workflow.
- Coordinated with cross-functional stakeholders and mentored team members, resolving day-to-day operational and technical queries to keep projects on track.
- Performed manual software testing — functional, regression, and validation testing — across multiple applications to ensure product quality and compliance with business requirements.
- Contributed to Research & Development (R&D) initiatives by coding and implementing new features and product enhancements.
- Performed root-cause analysis and technical troubleshooting on software defects, collaborating closely with development teams to accelerate issue resolution.

EDUCATION

B.E. Electronics & Communication Engineering — NMAM Institute of Technology

2019 – 2023

Mangalore, India | CGPA: 8.46 / 10

Pre-University (PUC) — S.D.M PU College

2017 – 2019

Mangalore, India

SKILLS

Operating Systems: Windows Administration, Linux (Ubuntu, CLI, basic administration)

Scripting & Automation: PowerShell, Batch Scripting, Python

Networking: TCP/IP, DNS, DHCP, SSH, Network Troubleshooting

Systems & IT Support: System Administration, IT Infrastructure Support, Task Scheduler, Active Directory/Domain Controller, Technical Support, System Diagnostics, Root Cause Analysis

Software Testing: Manual Testing — Functional, Regression & Validation Testing

Tools: Microsoft Excel, Word, PowerPoint, Git (Basic)

Engineering Fundamentals: Embedded Systems, 8051 Microcontroller, Digital System Design

Soft Skills: Communication, Team Leadership & Supervision, Stakeholder Management, Time Management, Attention to Detail, Team Collaboration, Multitasking, Decision Making, Conflict Resolution
